

FEATURES

Multiservice trolley in polypropylene/steel
(in accordance with CAM rules).

The steel parts are treated with anti-scratch epoxy painting and anti-oxidant, that ensures a great resistance to chemicals, weathering and UV rays.

Tube thickness 1,5 mm.

Tube diameter 22 mm.

The bag-holder is directly fixed on the steel frame.

The wheels are screwed into brass bushes inserted into the base during the molding phase.

Item no. **IdeaTop C 6**

Multiservice trolley

100 x 54 x 115h cm

16,6 Kg

1 Pc/Carton

STRUCTURE
